Sace Chemistry Past Exam Solution 2014 - uraweb.org

In chemistry, recrystallization is a technique used to purify chemicals. By dissolving both impurities and a compound in an appropriate solvent, either the desired compound or impurities can be removed from the solution, leaving the other behind. It is named for the crystals often formed when the compound precipitates out.

Recrystallization (chemistry) - Wikipedia

Alchemy (from Arabic: al-kīmiyā) is an ancient branch of natural philosophy, a philosophical and protoscientific tradition practiced throughout Europe, Africa, China and throughout Asia, observable in Chinese text from around 73-49 BC and Greco-Roman Egypt in the first few centuries CE.. Alchemists attempted to purify, mature, and perfect certain materials.
