MEASURING SUCCESS

Applying the “HEART” Framework to Measure Customer Success. HEART is a user-centered and data-driven framework that was created and tested by Google on their own products. Metrics are organized around five themes (thus spelling the acronym): Happiness, Engagement, Adoption, Retention and Task Completion. It helps identify main user behaviors we are looking for in each of the themes, then looks for signals that these desired behaviors are taking place, and finally helps determine the most ...

Adapting Google’s HEART Framework to Measure Customer Success

Create Key Performance Indicators (KPI’s) or measurable indicators of the Critical Success Factors. Include target levels for these, so success is clearly shown. Organize them into dashboard views for each audience that may be viewed live (on-line). Develop scorecards that may be used for trending, historical reporting.

A five step framework for business oriented metrics

Project success is a core concept of project management but its definition remains elusive. The project team must have a clear understanding of their project success objectives. This paper uses the logical framework method (LFM) as a foundation for defining project success. Using LFM, four levels of project objectives are identified: goal, purpose, output, and input.
