- A network refers to two or more connected computers that can share resources such as data, a printer, an Internet connection, applications, or a combination of these resources. © 2006 Cisco Systems, Inc.

## **Networking Fundamentals - Cisco**

Early computer networks used cable to connect computers together in a wired network. Most modern networks use wireless (wi-Fi) as the main connection media and networks tend to be a mixture of wired and wireless. The diagram below shows a wired Ethernet network. To work each device must be connected to a Ethernet hub or switch.
