When writing papers in the biological sciences, you're quite likely to document, test, or describe something.

It's impossible to verify, prove, or demonstrate that you're right about something because you can't do it within the realm of science.

Scientific writing, while an indispensable step of the scientific process, is often overlooked in undergraduate courses in favor of maximizing class time devoted to scientific concepts. However, the ability to effectively communicate research findings is crucial for success in the biological sciences.
